

Iago Rodríguez Romero

Associate Director

T: +34 981 250 266 E: irodriguez@delta-cgi.com

Iago Rodríguez Romero is a talented civil engineer with extensive experience working on commercial, contract and business development teams to support high-value infrastructure, industrial and naval projects across the globe.

His engineering expertise is reinforced by strong financial knowledge, negotiation capabilities, and communication skills. He is recognised for his ability to advise clients on complex contractual matters, mitigate risk exposure, and safeguard commercial interests through structured negotiation and proactive dispute prevention.

Iago provides contract management, technical and financial support throughout all stages of a project, including RFQs/RFPs, execution and closeout. He also has expertise in drafting independent expert reports for international arbitration in the construction and energy sectors, with a focus on contract management, cost analysis and financial impact.

Selected Project Experience

► FPSO vessel repair, Spain

Party appointed Contract Manager for a FPSO (Floating, Production, Storage and Offloading) vessel asset life extension project. Repair of the vessel to extend its production life by approximately 10 years. Project value around US\$ 120 M.

► Vessel upgrade, Spain

Party appointed Contract Manager for a vessel upgrade and crane replacement project. Vessel related to offshore wind energy works. Contract price around US\$ 60 M.
