

Bryan Thommes

Senior Consultant

T: +1 (571) 477 1849 **E:** bthommes@delta-cgi.com

Bryan Thommes is a forensic accounting specialist with significant experience supporting policyholders through complex property damage and business interruption claims. He has led the coordination, analysis and preparation of high-value claims across sectors such as hospitality, multifamily, retail, manufactured housing, storage, automotive and entertainment. Bryan brings deep technical acumen in financial modeling, loss evaluation and claims negotiation, consistently helping clients navigate the insurance recovery process with clarity and confidence.

Throughout his career, Bryan has partnered closely with private equity firms and major commercial clients to evaluate insured losses, streamline documentation and accelerate claim resolution following large-scale disaster events. He has also developed internal tracking and audit systems to enhance efficiency and accuracy in claim preparation. Known for his analytical rigor and client-focused approach, Bryan strengthens Delta's Insurance & Recovery practice with proven experience, industry versatility, and a commitment to delivering credible, data-driven results.

Selected Project Experience

- ▶ Partnered with top-tier private equity clients to assess insured losses, prepare financial models, and support claims negotiation with insurers.
- ▶ Developed internal claim-tracking systems and audit processes to streamline claim resolution and recovery for large-scale disaster events.
- ▶ Reviewed and analyzed claim-related documents, including income statements, payroll expenses, sales records, production documentation, invoices, purchase orders and quotations.
- ▶ Performed general ledger reconciliations for incurred costs and other supporting documentation received for claim purposes.
- ▶ Analyzed information gathered by investigation and report findings and recommendations.
- ▶ Created informed investment decisions by analyzing financial information to forecast financial statements, sectoral, industry and economic conditions.
