DELTA
CONSULTING GROUP

Samuel Kang

E: samuel@osbornes.com

Samuel Kang is a Consultant at Osborne Partners, A Delta Consulting Group Company, based in London. He has experience in structured finance and financial modeling, with a background in investment banking. His work has included developing variable cash flow models to forecast investment returns and evaluate financial performance under different assumptions.

Samuel has experience using financial models to stress-test returns on securities and assess the sensitivity of investment performance to changing conditions. His academic background in physics provides a strong quantitative foundation for financial analysis and complex modeling.
